

TNT Fashion Group

Making Retail Move

Out On A Limb Fashion Technology Editorial

Effortless Efficiency

Using the most advanced IT techniques, TNT Fashion Group makes sure you stay in the closest possible touch with what's happening. It's the most comprehensive CIT system around, and it's continuously evolving. Completely co-ordinating everything we do for you, from faster ordering to full management intelligence.

This is the support you need to stay on your toes. Handling, controlling and interlinking every element in the process. RF scanning of individual items onto delivery vehicles updates our tracking system in real time, making everything simpler and more accurate throughout.

From booking-in shipments to online tracking and PODs, masterminding inter-branch transfers, inventory control or producing management reports, our IT facilities have the solution for you.

And don't worry. If your IT system doesn't match ours, we'll work with you to create a hybrid customer/supplier solution to make sure it does. That's what partnerships are for.
